

PLACEMENT REPORT 2018

Executive Placements (2016-2018) – 33rd Batch

Summer Placements (2017-2019) – 34th Batch

This year's Placement season once again created opportunities that matched the strengths of students with their interests. It began on 24th November 2017, the Day One of the executive placement process. As many as 72 offers were made by 19 companies giving it a fantastic start. Overall 128 offers were made to eligible students during the entire placement process by 59 companies. These companies represented almost all major industry blocks thus giving our students a host of choices to make a career in.

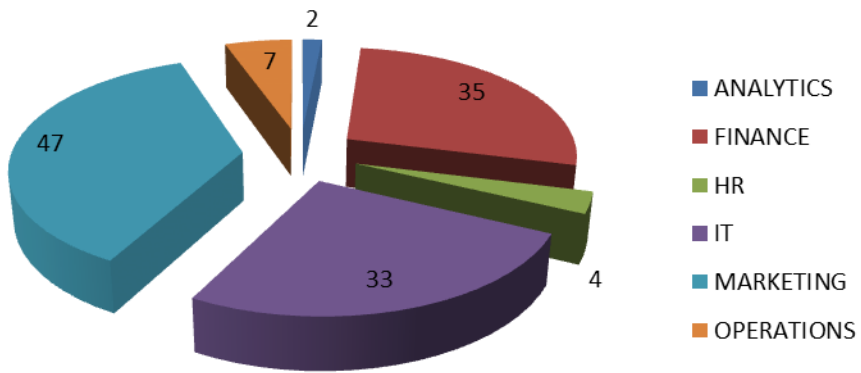

The summer internship also known as corporate immersion program (CIP) attracted 47 companies across different industries who made 118 offers. A number of these offers were with a view to assess student-organization fit and make a pre-placement offer at the end of the program. CIP aspires to provide students an opportunity to learn by working on real-time challenges of the organization thus preparing them in a way that they can hit the ground running once they join the industry. CIP is also monitored by a faculty supervisor who interacts with both the student and his project guide to facilitate closer-tie up with the industry and the institute.

The details of the placement process are given below:
